Networks

Contents

January 1993 volume 23, number 1

Editorial ii

Network Transformations and Bounding Network Reliability 1
J. I. Brown, C. J. Colbourn, and J. S. Devitt

A Catalog of Steiner Tree Formulations 19
M. X. Goemans and Y.-s. Myung

Efficient Parallel Algorithms for Bipartite Permutation Graphs 29
L. Chen and Y. Yesha

Canceling Most Helpful Total Cuts for Minimum Cost Network Flow 41
T. R. Ervolina and S. T. McCormick

A Two-Stage Network with Dual Partial Concentrators 53
F. K. Hwang and G. W. Richards

Doubly Chordal Graphs, Steiner Trees, and Connected Domination 59
M. Moscarini

Local Broadcasting in a Tree under Minisum Criterion 71
J.-m. Koh and D.-w. Tcha

March 1993 volume 23, number 2

The Traveling Salesman Problem with Cumulative Costs 81
L. Bianco, A. Mingozzi, and S. Ricciardelli

Graph Endpoint Coloring and Distributed Processing 93
D. de Werra, P. Hell, T. Kameda, N. Katoh, Ph. Solot, and M. Yamashita

Sharp Bounds on the Order, Size, and Stability Number of Graphs 99
P. Hansen and M. Zheng

Shortest Paths, Single Origin-Destination Network Design, and Associated Polyhedra 103
T. L. Magnanti and P. Mirchandani

Grid Spanners 123
A. L. Liestman and T. C. Shermer

Edge Fault Tolerance in Graphs 135
F. Harary and J. P. Hayes

A Polynomial Time Solvable Concave Network Flow Problem 143
G. M. Guisewite and P. M. Pardalos

Book Review 149

May 1993 volume 23, number 3

On the Star–Delta Transformation in Network Reliability 151
L. Traldi

Decomposition of Bipartite Graphs under Degree Constraints 159
H. J. Broersma, R. J. Faudree, J. van den Heuvel, and H. J. Veldman

Bounds for the General Capacitated Routing Problem 165
K. Jansen

Shortest Paths in Stochastic Networks with Arc Lengths Having Discrete Distributions 175
G. A. Corea and V. G. Kulkarni

On Uniformly Optimally Reliable Graphs for Pair-Connected Reliability with Vertex Failures 185
A. T. Amin, K. T. Siegrist, and P. J. Slater

Linear-Time Algorithms for the 2-Connected Steiner Subgraph Problem on Special Classes of Graphs 195
C. R. Coullard, A. Rais, R. L. Rardin, and D. K. Wagner

An Upper Bound on the Number of Cliques in a Graph 207
M. Farber, M. Hujter, and Z. Tuza

July 1993 volume 23, number 4

Introduction 211
D. F. Hsu

Fundamental Algorithms for the Star and Pancake Interconnection Networks with Applications to Computational Geometry 215
S. G. Akl, K. Qiu, and I. Stojmenović

On the Adjacency Properties of Paley Graphs 227
W. Ananchuen and L. Caccetta

Uniform *d*-Emulations of Rings, with an Application to Distributed Virtual Ring Construction 237
E. M. Bakker and J. van Leeuwen

On the Edge Forwarding Index Problem for Small Graphs 249
A. Bouabdallah and D. Sotteau

Undirected Loop Networks 257
S. Chen and X.-D. Jia

μ-Star: An Indirect Star Network 261
W.-S. E. Chen, K. Y. Lee, and M. T. Liu

Fault–Tolerant Hypercube Broadcasting via Information Dispersal 271
L. Gargano, A. A. Rescigno, and U. Vaccaro

The Minimum Order of a Cayley Graph with Given Degree and Diameter 283
Y. O. Hamidoune

Renormalization of Two–Terminal Reliability 289
D. D. Harms and C. J. Colbourn

A Unidirectional Ring Partition Problem 299
J.-J. Hu, S.-N. Yang, and M.-S. Chern

The Most Vital Edges of Matching in a Bipartite Graph 309
C.-N. Hung, L.-H. Hsu, and T.-Y. Sung

A New Class of Interconnection Networks Based on the Alternating Group 315
J.-S. Jwo, S. Lakshmivarahan, and S. K. Dhall

Optimization of the Reliability Polynomial in Presence of Mediocre Elements 327
G. O. H. Katona and W. A. Woyczyński

Some Minimum Gossip Graphs 333
R. Labahn

Additive Graph Spanners 343
A. L. Liestman and T. C. Shermer

Fast Fault-Tolerant Parallel Communication for de Bruijn and Digit-Exchange Networks Using Information Dispersal 365
Y.-D. Lyuu

Communication Structures in Fault-Tolerant Distributed Systems 379
D. K. Pradhan and F. J. Meyer

Routing Permutations on a Graph 391
M. Ramras

Construction of Large-Size Interconnection Networks with High Performance 399
H. Shen and R.-J. Back

Reliability Evaluation and Decision Problems in Extra Stage Shuffle-Exchange MINs 415
J. L. Trahan and S. Rai

Asymmetrical Multiconnection Three-Stage Clos Networks 427
A. Varma and S. Chalasani

Off-Line Permutation Routing on Circuit-Switched Fixed-Routing Networks 441
A. Youssef

A Very Short Proof of a Conjecture Concerning Set-to-Set Broadcasting 449
Q. Li, Z. Zhang, and J. Xu

August 1993 volume 23, number 5

Most Reliable Double Loop Networks in Survival Reliability 451
X. D. Hu, F. K. Hwang, and W.-C. W. Li

Maintaining Bipartite Matchings in the Presence of Failures 459
E. H.-M. Sha and K. Steiglitz

Applications of *E*-Graphs in Network Design 473
T. W. Haynes and L. M. Lawson

A New Method for Constructing Minimal Broadcast Networks 481
J. A. Ventura and X. Weng

A Bayesian Analysis of Simulation Algorithms for Inference in Belief Networks 499
P. Dagum and E. Horvitz

October 1993 volume 23, number 6

Optimal Multifacility Defensive Location on Planes with Rectilinear Distances 517
D. Trietsch

A Branch and Bound Algorithm for the Capacitated Minimum Spanning Tree Problem 525
K. Malik and G. Yu

Finding All Minimum-Size Separating Vertex Sets in a Graph 533
A. Kanevsky

On Locating Path- or Tree-Shaped Facilities on Networks 543
S. L. Hakimi, E. F. Schmeichel, and M. Labbe

A Differential Game Model of Nash Equilibrium on a Congested Traffic Network 557
B.-W. Wie

Finding Minimum Cost to Time Ratio Cycles with Small Integral Transit Times 567
M. Hartmann and J. B. Orlin

October 1993 volume 23, number 7

Bounding Procedures for Multistage Stochastic Dynamic Networks 575
L. F. Frantzeskakis and W. B. Powell

Determining Efficient Facility Locations on a Tree Network Operating as a FIFO *M*/*G*/1 Queue 597
R. Batta and S. Y. Prasad

Sensitivity Analysis in Stochastic Flow Networks Using the Monte Carlo Method 605
C. Alexopoulos and G. S. Fishman

Backordering in a Multiperiod Transshipment Network 623
R. A. Sandbothe

A Two-Commodity Flow Formulation for the Traveling Salesman and the Makespan Problems with Time Windows 631
A. Langevin, M. Desrochers, J. Derosiers, S. Gélinas, and F. Soumis

Cycle Prefix Digraphs for Symmetric Interconnection Networks 641
V. Faber, J. W. Moore, and W. Y. C. Chen

December 1993 volume 23, number 8

Some Graph-Theoretical Models for Scheduling in Automated Production Systems 651
D. de Werra and Ph. Solot

Parallel Iterative Search Methods for Vehicle Routing Problems 661
É. Taillard

On Stochastic Spanning Tree Problem 675
S. Geetha and K. P. K. Nair

The Dynamic Predicate Stashing Copy Problem 681
B. Sansó and F. Soumis

Optimal Communication in Networks with Randomly Distributed Byzantine Faults 691
D. M. Blough and A. Pelc

A Simple and Fast Label Correcting Algorithm for Shortest Paths 703
D. P. Bertsekas

Subject Index to Volume 23 713
